# Your Baby at 2 Months

Child's Name Child's Age Today's Date

How your child plays, learns, speaks, acts, and moves offers important clues about your child's development. Developmental milestones are things most children can do by a certain age.

Check the milestones your child has reached by the end of 2 months. Take this with you and talk with your child's doctor at every visit about the milestones your child has reached and what to expect next.

### What Most Babies Do at this Age:

#### Social/Emotional

- Begins to smile at people
- Can briefly calm himself (may bring hands to mouth and suck on hand)
- □ Tries to look at parent

#### Language/Communication

- □ Coos, makes gurgling sounds
- Turns head toward sounds

#### Cognitive (learning, thinking, problem-solving)

- Pays attention to faces
- Begins to follow things with eyes and recognize people at a distance
- ☐ Begins to act bored (cries, fussy) if activity doesn't change

#### Movement/Physical Development

- Can hold head up and begins to push up when lying on tummy
- Makes smoother movements with arms and legs

## Act Early by Talking to Your Child's Doctor if Your Child:

- Doesn't respond to loud sounds
- Doesn't watch things as they move
- Doesn't smile at people
- Doesn't bring hands to mouth
- ☐ Can't hold head up when pushing up when on tummy

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your state's public early intervention program. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO (1-800-232-4636).

You can help your baby learn and grow. Talk, read, sing, and play together every day. Below are some activities to enjoy with your 2-month-old baby today.

## What You Can Do for Your 2-Month-Old:

- Cuddle, talk, and play with your baby during feeding, dressing, and bathing. Help your baby learn to calm herself. It's okay for her to suck on her fingers. about them. Begin to help your baby get into a routine, such as sleeping at night more than in the day, and have regular schedules. ☐ Getting in tune with your baby's likes and dislikes can help you feel more comfortable and confident. Act excited and smile when your baby makes sounds. Copy your baby's sounds sometimes, but also use clear language. Pay attention to your baby's different cries so that you learn to know what he wants. ☐ Talk, read, and sing to your baby. ☐ Play peek-a-boo. Help your baby play peek-a-boo, too.
  - ☐ Place a baby-safe mirror in your baby's crib so she can look at herself.
  - Look at pictures with your baby and talk about them.
  - Lay your baby on his tummy when he is awake and put toys near him.
  - Encourage your baby to lift his head by holding toys at eye level in front of him.
  - ☐ Hold a toy or rattle above your baby's head and encourage her to reach for it.
  - Hold your baby upright with his feet on the floor. Sing or talk to your baby as he is upright.

# Your Baby at 4 Months

Child's Name Child's Age Today's Date

How your child plays, learns, speaks, acts, and moves offers important clues about your child's development. Developmental milestones are things most children can do by a certain age.

Check the milestones your child has reached by the end of 4 months. Take this with you and talk with your child's doctor at every visit about the milestones your child has reached and what to expect next.

### What Most Babies Do at this Age:

#### Social/Emotional

- ☐ Smiles spontaneously, especially at people
- ☐ Likes to play with people and might cry when playing stops
- Copies some movements and facial expressions, like smiling or frowning

#### Language/Communication

- Begins to babble
- ☐ Babbles with expression and copies sounds he hears
- ☐ Cries in different ways to show hunger, pain, or being tired

#### Cognitive (learning, thinking, problem-solving)

- ☐ Lets you know if she is happy or sad
- Responds to affection
- Reaches for toy with one hand
- Uses hands and eyes together, such as seeing a toy and reaching for it
- ☐ Follows moving things with eyes from side to side
- Watches faces closely
- ☐ Recognizes familiar people and things at a distance

#### Movement/Physical Development

- Holds head steady, unsupported
- Pushes down on legs when feet are on a hard surface
- May be able to roll over from tummy to back
- ☐ Can hold a toy and shake it and swing at dangling toys
- □ Brings hands to mouth
- ☐ When lying on stomach, pushes up to elbows

# Act Early by Talking to Your Child:

- Doesn't watch things as they move
- Doesn't smile at people
- Can't hold head steady
- Doesn't coo or make sounds
- □ Doesn't bring things to mouth
- ☐ Doesn't push down with legs when feet are placed on a hard surface
- ☐ Has trouble moving one or both eyes in all directions

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your state's public early intervention program. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO (1-800-232-4636).

You can help your baby learn and grow. Talk, read, sing, and play together every day. Below are some activities to enjoy with your 4-month-old baby today.

### What You Can Do for Your 4-Month-Old:

- ☐ Hold and talk to your baby; smile and be cheerful while you do. Set steady routines for sleeping and feeding. Pay close attention to what your baby likes and doesn't like; you will know how best to meet his needs and what you can do to make your baby happy. Copy your baby's sounds. Act excited and smile when your baby makes Have quiet play times when you read or sing to your baby. ☐ Give age-appropriate toys to play with, such as rattles or colorful pictures. Play games such as peek-a-boo. Provide safe opportunities for your baby to reach for toys and explore his surroundings.
- Put toys near your baby so that she can reach for them or kick her feet.
- ☐ Put toys or rattles in your baby's hand and help him to hold them.
- ☐ Hold your baby upright with feet on the floor, and sing or talk to your baby as she "stands" with support.

# Your Baby at 6 Months

Child's Name Child's Age Today's Date

How your child plays, learns, speaks, acts, and moves offers important clues about your child's development. Developmental milestones are things most children can do by a certain age.

Check the milestones your child has reached by the end of 6 months. Take this with you and talk with your child's doctor at every visit about the milestones your child has reached and what to expect next.

### What Most Babies Do at this Age:

#### Social/Emotional

- ☐ Knows familiar faces and begins to know if someone is a stranger
- ☐ Likes to play with others, especially parents
- ☐ Responds to other people's emotions and often seems happy
- ☐ Likes to look at self in a mirror

#### Language/Communication

- □ Responds to sounds by making sounds
- ☐ Strings vowels together when babbling ("ah," "eh," "oh") and likes taking turns with parent while making sounds
- Responds to own name
- ☐ Makes sounds to show joy and displeasure
- ☐ Begins to say consonant sounds (jabbering with "m," "b")

#### Cognitive (learning, thinking, problem-solving)

- Looks around at things nearby
- Brings things to mouth
- ☐ Shows curiosity about things and tries to get things that are out of reach
- ☐ Begins to pass things from one hand to the other

#### Movement/Physical Development

- ☐ Rolls over in both directions (front to back, back to front)
- □ Begins to sit without support
- ☐ When standing, supports weight on legs and might bounce
- Rocks back and forth, sometimes crawling backward before moving forward

# Act Early by Talking to Your Child:

- Doesn't try to get things that are in reach
- Shows no affection for caregivers
- Doesn't respond to sounds around him
- ☐ Has difficulty getting things to mouth
- ☐ Doesn't make vowel sounds ("ah", "eh", "oh")
- Doesn't roll over in either direction
- □ Doesn't laugh or make squealing sounds
- □ Seems very stiff, with tight muscles
- ☐ Seems very floppy, like a rag doll

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your state's public early intervention program. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO (1-800-232-4636).

You can help your baby learn and grow. Talk, read, sing, and play together every day. Below are some activities to enjoy with your 6-month-old baby today.

What You Can Do for Your 6-Month-Old:				
☐ Play on the flood ☐ Learn to read you keep doing what break and com ☐ Show your baboupset. She mayour she makes ☐ Repeat your chowith those soun "bah," say "botom he makes and books to she babbles and when your babout alk about it. ☐ When he drops	or with your baby every day.  our baby's moods. If he's happy, at you are doing. If he's upset, take a fort your baby.  y how to comfort herself when she's y suck on her fingers to self soothe.  I' play—when he smiles, you smile; s sounds, you copy them.  ild's sounds and say simple words nds. For example, if your child says ttle" or "book."	Point out new things to your baby and name them.  Show your baby bright pictures in a magazine and name them.  Hold your baby up while she sits or support her with pillows. Let her look around and give her toys to look at while she balances.  Put your baby on his tummy or back and put toys just out of reach. Encourage him to roll over to reach the toys.		
	icture books to your baby.			

# Your Baby at 9 Months

Child's Name Child's Age Today's Date

How your child plays, learns, speaks, acts, and moves offers important clues about your child's development. Developmental milestones are things most children can do by a certain age.

Check the milestones your child has reached by the end of 9 months. Take this with you and talk with your child's doctor at every visit about the milestones your child has reached and what to expect next.

## What Most Babies Do at this Age:

#### Social/Emotional

- May be afraid of strangers
- May be clingy with familiar adults
- ☐ Has favorite toys

#### Language/Communication

- Understands "no"
- ☐ Makes a lot of different sounds like "mamamama" and "bababababa"
- Copies sounds and gestures of others
- Uses fingers to point at things

#### Cognitive (learning, thinking, problem-solving)

- ☐ Watches the path of something as it falls
- □ Looks for things he sees you hide
- ☐ Plays peek-a-boo
- Puts things in her mouth
- Moves things smoothly from one hand to the other
- ☐ Picks up things like cereal o's between thumb and index finger

#### Movement/Physical Development

- ☐ Stands, holding on
- □ Can get into sitting position
- ☐ Sits without support
- Pulls to stand
- Crawls

# Act Early by Talking to Your Child:

- Doesn't bear weight on legs with support
- Doesn't sit with help
- ☐ Doesn't babble ("mama", "baba", "dada")
- ☐ Doesn't play any games involving back-and-forth play
- □ Doesn't respond to own name
- ☐ Doesn't seem to recognize familiar people
- □ Doesn't look where you point
- ☐ Doesn't transfer toys from one hand to the other

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your state's public early intervention program. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO (1-800-232-4636).

The American Academy of Pediatrics recommends that children be screened for general development at the 9-month visit. Ask your child's doctor about your child's developmental screening.

You can help your baby learn and grow. Talk, read, sing, and play together every day. Below are some activities to enjoy with your 9-month-old baby today.

### What You Can Do for Your 9-Month-Old:

- Pay attention to the way he reacts to new situations and people; try to continue to do things that make your baby happy and comfortable. As she moves around more, stay close so she knows that you are near. Continue with routines; they are especially important now. Play games with "my turn, your turn." Say what you think your baby is feeling. For example, say, "You are so sad, let's see if we can make you feel better." Describe what your baby is looking at; for example, "red, round ball." ☐ Talk about what your baby wants when he points at something. Copy your baby's sounds and words. Ask for behaviors that you want. For example, instead of saying "don't stand," say "time to sit."
- ☐ Teach cause-and-effect by rolling balls back and forth, pushing toy cars and trucks, and putting blocks in and out of a container.
- ☐ Play peek-a-boo and hide-and-seek.
- Read and talk to your baby.
- Provide lots of room for your baby to move and explore in a safe area.
- ☐ Put your baby close to things that she can pull up on safely.

## Your Child at 1 Year

Child's Name Child's Age How your child plays, learns, speaks, acts, and moves offers important clues about your child's development. Developmental milestones are things most children can do by a certain age. Check the milestones your child has reached by his or her 1st birthday. Take this with you and talk with your child's doctor at every visit about the milestones your child has reached and what to expect next. What Most Children Do at this Age: Social/Emotional Is shy or nervous with strangers Cries when mom or dad leaves ☐ Has favorite things and people Shows fear in some situations ☐ Hands you a book when he wants to hear a story Repeats sounds or actions to get attention Puts out arm or leg to help with dressing ☐ Plays games such as "peek-a-boo" and "pat-a-cake" Language/Communication Responds to simple spoken requests ☐ Uses simple gestures, like shaking head "no" or waving "bye-bye" ☐ Makes sounds with changes in tone (sounds more like speech) ☐ Says "mama" and "dada" and exclamations like "uh-oh!" □ Tries to say words you say Cognitive (learning, thinking, problem-solving) ■ Explores things in different ways, like shaking, banging, throwing Finds hidden things easily ■ Looks at the right picture or thing when it's named Copies gestures ☐ Starts to use things correctly; for example, drinks from a cup, brushes hair Bangs two things together ☐ Puts things in a container, takes things out of a container

Movement/Physical Development

- ☐ Gets to a sitting position without help
- ☐ Pulls up to stand, walks holding on to furniture ("cruising")
- May take a few steps without holding on
- May stand alone

Today's Date

- Doesn't crawl
- Can't stand when supported
- ☐ Doesn't search for things that she sees you hide.
- ☐ Doesn't say single words like "mama" or "dada"
- □ Doesn't learn gestures like waving or shaking head
- Doesn't point to things
- ☐ Loses skills he once had

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your state's public early intervention program. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO (1-800-232-4636).

Read with your child every day. Have your child Provide lots of safe places for your toddler to explore. turn the pages. Take turns labeling pictures with (Toddler-proof your home. Lock away products for vour child. cleaning, laundry, lawn care, and car care. Use a safety gate and lock doors to the outside and the basement.) Build on what your child says or tries to say, or what he points to. If he points to a truck and says Give your child push toys like a wagon or "kiddie "t" or "truck," say, "Yes, that's a big, blue truck." push car."

## Your Child at 18 Months (11/2 Yrs)

Child's Name Child's Age **Today's Date** 

How your child plays, learns, speaks, acts, and moves offers important clues about your child's development. Developmental milestones are things most children can do by a certain age.

Check the milestones your child has reached by the end of 18 months. Take this with you and talk with your child's doctor at every visit about the milestones your child has reached and what to expect next.

### What Most Children Do at this Age:

#### Social/Emotional

- ☐ Likes to hand things to others as play
- May have temper tantrums
- May be afraid of strangers
- Shows affection to familiar people
- ☐ Plays simple pretend, such as feeding a doll
- May cling to caregivers in new situations
- Points to show others something interesting
- Explores alone but with parent close by

#### Language/Communication

- □ Says several single words
- ☐ Says and shakes head "no"
- Points to show someone what he wants

#### Cognitive (learning, thinking, problem-solving)

- ☐ Knows what ordinary things are for; for example, telephone, brush, spoon
- ☐ Points to get the attention of others
- $\ \square$  Shows interest in a doll or stuffed animal by pretending to feed
- ☐ Points to one body part
- Scribbles on his own
- ☐ Can follow 1-step verbal commands without any gestures; for example, sits when you say "sit down"

#### Movement/Physical Development

- Walks alone
- ☐ May walk up steps and run
- Pulls toys while walking
- Can help undress herself
- Drinks from a cup
- Eats with a spoon

# Child's Doctor if Your Child:

- Doesn't point to show things to others
- Can't walk
- Doesn't know what familiar things are for
- Doesn't copy others
- Doesn't gain new words
- Doesn't have at least 6 words
- □ Doesn't notice or mind when a caregiver leaves or returns
- Loses skills he once had

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your state's public early intervention program. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO (1-800-232-4636).

The American Academy of Pediatrics recommends that children be screened for general development and autism at the 18-month visit. Ask your child's doctor about your child's developmental screening.

### What You Can Do for Your 18-Month-Old:

Provide a safe, loving environment. It's important to be consistent and predictable.	Hide things under blankets and pillows and encourage him to find them.		
☐ Praise good behaviors more than you punish bad behaviors (use only very brief time outs).	Play with blocks, balls, puzzles, books, and toys that teach cause and effect and problem solving.		
Describe her emotions. For example, say, "You are happy when we read this book."	<ul><li>Name pictures in books and body parts.</li><li>Provide toys that encourage pretend play; for</li></ul>		
☐ Encourage pretend play.	example, dolls, play telephones.		
☐ Encourage empathy. For example, when he sees a child who is sad, encourage him to hug or pat the other child.	Provide safe areas for your child to walk and move around in.		
	Provide toys that she can push or pull safely.		
Read books and talk about the pictures using simple words.	☐ Provide balls for her to kick, roll, and throw.		
☐ Copy your child's words.	Encourage him to drink from his cup and use a spoon, no matter how messy.		
☐ Use words that describe feelings and emotions.	■ Blow bubbles and let your child pop them.		
☐ Use simple, clear phrases.	Blow bubbles and let your child pop them.		
☐ Ask simple questions.			

# Your Child at 2 Years

Child's Name Child's Age How your child plays, learns, speaks, acts, and moves offers important clues about your child's development. Developmental milestones are things most children can do by a certain age. Check the milestones your child has reached by his or her 2nd birthday. ### Act Early by Talking to Your Child's Doctor if Your Child:

- ☐ Can't jump in place
- Has trouble scribbling
- ☐ Shows no interest in interactive games or make-believe
- ☐ Ignores other children or doesn't respond to people outside the family
- ☐ Resists dressing, sleeping, and using the toilet
- ☐ Can't retell a favorite story
- □ Doesn't follow 3-part commands
- Doesn't understand "same" and "different"
- □ Doesn't use "me" and "you" correctly
- Speaks unclearly
- Loses skills he once had

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your local public school. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO (1-800-232-4636).

### What You Can Do for Your 4-Year-Old:

Play make-believe with your child. Let her be the ☐ Use words like "first," "second," and "finally" when leader and copy what she is doing. talking about everyday activities. This will help your child learn about sequence of events. Suggest your child pretend play an upcoming event that might make him nervous, like going to preschool ■ Take time to answer your child's "why" questions. If you don't know the answer, say "I don't know," or or staying overnight at a grandparent's house. help your child find the answer in a book, on the ☐ Give your child simple choices whenever you can. Internet, or from another adult. Let your child choose what to wear, play, or eat for a snack. Limit choices to 2 or 3. ☐ When you read with your child, ask him to tell you what happened in the story as you go. During play dates, let your child solve her own problems with friends, but be nearby to help out ☐ Say colors in books, pictures, and things at home. if needed. Count common items, like the number of snack crackers, stairs, or toy trains. Encourage your child to use words, share toys, and take turns playing games of one another's choice. Teach your child to play outdoor games like tag, follow the leader, and duck, duck, goose. Give your child toys to build imagination, like dress-up clothes, kitchen sets, and blocks. Play your child's favorite music and dance with your child. Take turns copying each other's moves. Use good grammar when speaking to your child. Instead of "Mommy wants you to come here," say, "I want you to come here."

## Your Child at 5 Years

Child's Name Child's Age Today's Date

How your child plays, learns, speaks, acts, and moves offers important clues about your child's development. Developmental milestones are things most children can do by a certain age.

Check the milestones your child has reached by his or her 5th birthday. Take this with you and talk with your child's doctor at every visit about the milestones your child has reached and what to expect next.

## What Most Children Do at this Age:

#### Social/Emotional

- Wants to please friends
- Wants to be like friends
- More likely to agree with rules
- ☐ Likes to sing, dance, and act
- Is aware of gender
- ☐ Can tell what's real and what's make-believe
- □ Shows more independence (for example, may visit a next-door neighbor by himself [adult supervision is still needed])
- ☐ Is sometimes demanding and sometimes very cooperative

#### Language/Communication

- Speaks very clearly
- ☐ Tells a simple story using full sentences
- ☐ Uses future tense; for example, "Grandma will be here."
- Says name and address

#### Cognitive (learning, thinking, problem-solving)

- ☐ Counts 10 or more things
- ☐ Can draw a person with at least 6 body parts
- ☐ Can print some letters or numbers
- ☐ Copies a triangle and other geometric shapes

- ☐ Hops; may be able to skip
- Can do a somersault
- ☐ Uses a fork and spoon and sometimes a table knife
- Can use the toilet on her own
- Swings and climbs

# Act Early by Talking to Your Child:

- Doesn't show a wide range of emotions
- ☐ Shows extreme behavior (unusually fearful, aggressive, shy or sad)
- ☐ Unusually withdrawn and not active
- ☐ Is easily distracted, has trouble focusing on one activity for more than 5 minutes
- ☐ Doesn't respond to people, or responds only superficially
- ☐ Can't tell what's real and what's make-believe
- Doesn't play a variety of games and activities
- Can't give first and last name
- Doesn't use plurals or past tense properly
- Doesn't talk about daily activities or experiences
- Doesn't draw pictures
- ☐ Can't brush teeth, wash and dry hands, or get undressed without help
- Loses skills he once had

Tell your child's doctor or nurse if you notice any of these signs of possible developmental delay for this age, and talk with someone in your community who is familiar with services for young children in your area, such as your local public school. For more information, go to www.cdc.gov/concerned or call 1-800-CDC-INFO (1-800-232-4636).

You can help your child learn and grow. Talk, read, sing, and play together every day. Below are some activities to enjoy with your 5-year-old child today.

What You Can Do for Your 5-Year-Old:				
<ul> <li>Continue to arrange play dates, trips to the park, or play groups. Give your child more freedom to choose activities to play with friends, and let your child work out problems on her own.</li> <li>Your child might start to talk back or use profanity (swear words) as a way to feel independent.</li> <li>Do not give a lot of attention to this talk, other than a brief time out. Instead, praise your child when he asks for things nicely and calmly takes "no" for an answer.</li> </ul>	<ul> <li>Teach your child time concepts like morning, afternoon, evening, today, tomorrow, and yesterday. Start teaching the days of the week.</li> <li>Explore your child's interests in your community. For example, if your child loves animals, visit the zoo or petting farm. Go to the library or look on the Internet to learn about these topics.</li> <li>Keep a handy box of crayons, paper, paint, child scissors, and paste. Encourage your child to draw and make art projects with different supplies.</li> </ul>			
<ul> <li>This is a good time to talk to your child about safe touch. No one should touch "private parts" except doctors or nurses during an exam or parents when they are trying to keep the child clean.</li> <li>Teach your child her address and phone number.</li> <li>When reading to your child, ask him to predict what will happen next in the story.</li> <li>Encourage your child to "read" by looking at the pictures and telling the story.</li> </ul>	<ul> <li>Play with toys that encourage your child to put things together.</li> <li>Teach your child how to pump her legs back and forth on a swing.</li> <li>Help your child climb on the monkey bars.</li> <li>Go on walks with your child, do a scavenger hunt in your neighborhood or park, help him ride a bike with training wheels (wearing a helmet).</li> </ul>			

These guidelines were assembled by the United States of America Center for Disease Control and Prevention and Department of Health and Human Services.
